**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-9 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 5 and 7, the prior art fails to disclose or make obvious a linear accelerator comprising a plurality of accelerating cells arranged to convey a beam, adjacent cells being linked by a coupling cell, the coupling cells being arranged to dictate the ratio of the electric field in the respective adjacent accelerating cells, at least one cell being variable to allow a range of ratios including positive values and negative values.

The main feature that separates the scintillator apart from prior art is the capability of a coupling cell to be varied to provide positive and negative ratios. Some conventional linear accelerators include means for varying the coupling between adjacent accelerating cells to control the ratio of the electric fields. Others include a capability of reversing the electric field (generating a negative ratio). However, the prior art does not teach combining the capability to vary the ratio to positive and negative values in the same cell.

Claims 2-4, 6, and 8-9 are allowed by virtue of their dependency on claims 1, 5 and 7 respectively.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
